

Detached Carport Permitting Guide

For questions or inquiries, please allow up to 48 hours for a response:

ResidentialPermits@denvergov.org or (720) 865-2710

When you are ready to apply, go to denvergov.org/DS to make an appointment for the **Single-family/Duplex Walk-through** service at the permit counter.

Start here:

1 Do you need zoning or building permits?

All detached carports need a zoning and a building permit. Depending on your project, you may need the following approvals before you can apply for zoning/building permits (listed in order):

- Landmark Certificate of Appropriateness - All residential projects involving the exterior of a designated landmark or structure in a historic district must be reviewed first by Landmark staff. See denvergov.org/preservation to learn more.
- Forestry - If there are public right-of-way trees in the project area, contact the Office of the City Forester at 720-913-0651 or forestry@denvergov.org. See denvergov.org/forestry to learn more.
- Demolition - Obtain a separate demolition permit if you plan to remove an existing accessory structure prior to erecting a new accessory structure. See the "Demolition" page of denvergov.org/DS for details.

Other permits you may need for your project:

- Sewer Use and Drainage Permit (SUDP) - Visit denvergov.org/SUDP for applications and instructions.
- Quick Permits for roofing or electrical work - Visit denvergov.org/quickpermits to apply for these online.
- Right-of-Way Street Occupancy Permit - Visit denvergov.org/pwpermits.

2 What do I need to submit for a zoning or building permit?

Submit a completed application and statement of valuation (attached), complete building plans, a dimensioned site plan, and fully dimensioned elevations (use the template provided or submit scaled drawings). Zoning-only submittals do not need building plans.

- This guide contains sample site plans and elevations. For additional guidance, zoning tip sheets for setbacks, bulk planes, and more are available on the "Outside the Home" page of denvergov.org/DS.
- Building plans, details, and specifications for construction must clearly show the following:

- | | |
|------------------------------------|---------------------------------------|
| 1) Connection to home | 7) Post size |
| 2) Roof covering and underlayment | 8) Connector description and location |
| 3) Rafter / truss size and spacing | 9) % of glazing |
| 4) Roof span | 10) Stud size and spacing |
| 5) Foundation / slab details | 11) Wall and roof sheathing |
| 6) Beam size and span | 12) Exterior wall covering |

Homeowners may apply for building permits without a contractor but will need to meet specific eligibility criteria and submit a signed affidavit, as outlined on the "Homeowner Permits" page of denvergov.org/DS. You must also show a valid photo I.D. that matches the property owner name listed in the Denver Assessor's database.

Contractors who apply must show an original contractor's license (no copies or faxes accepted) or a company check or credit card that matches the exact licensed company name and spelling.

Note: Proof of ownership and/or contractor will be verified at the time of permit issuance. Proof shall be provided per Admin Policy 131.1 (homeowner) or DBC 121 (contractor).	
NO REFUND WILL BE GIVEN FOR ANY PLAN REVIEW FEE COLLECTED BASED ON THE VALUATION PROVIDED BY APPLICANT.	

Statement of Valuation of Proposed Work for Single-Family & Duplex Projects

Project Address: _____

Notes:

1. Valuation shall be based on the total replacement cost to the owner (including labor, profit, overhead, materials, equipment and installation).
2. Batt insulation in floors and roofs, and all wall insulation, shall be included with the valuation for the RESCON permit.
3. The provided valuation will be checked against current construction costs provided by the International Code Council, Engineering News Records or other means available to determine if the valuation is in line with current market costs.

Zoning Land Use Information

- If the front setback is less than 20 feet on one (but not both) of the reference zone lots, see Sec. 13.1.5.3.C.2.b of the Denver Zoning Code.
 - If one of the reference zone lots is set back 50 percent or more of the zone lot depth from the primary street zone lot line, see Sec. 13.1.5.3.C.2.c of the Denver Zoning Code.
 - If a structure is within 1 foot of required setback on any side of the lot, see setback verification policy, Admin. 133.3 in the 2011/2016 Denver Building Code Amendments.
- * Your reviewer may ask to see building elevations, or other additional information, when it is necessary to complete a thorough and accurate review.
